

APPLICATION DEVELOPER (C, C++, secure Web design & OpenGL)

START DATE - AUGUST 2020

CLOSING DATE FOR APPLICATIONS – 30th JUNE 2020

As part of a planned expansion to assist us with the wide range of consultancy projects that we are engaged on, we are seeking an Application Developer to write and maintain an in-house application to facilitate complex calculations complying with industry regulations and standards for pressurised equipment. We anticipate that the role will expand to include further internal application development to meet design engineering requirements.

Applicants are likely to have a good degree in computing, mathematics or similar and have up to 5 years' experience in computer programming or software development. Applicants must be competent in secure Web design, C, C++ and OpenGL. An engineering background would be useful but is not essential.

The role would suit those who currently work in a team or larger organisation and are looking for an opportunity to take on responsibility for the entire life cycle of the software development process.

The developer will be responsible for the design, architecture and maintenance of the application, combining the skills of a programmer, analyst, architect, and tester. They will also be responsible for technical documentation and liaising with relevant stakeholders.

The applicant will initially work under guidance of a Project Engineer but will be expected to take on an increasing level of responsibility.

Good communication, self-motivation and a conscientious attitude will all be necessary to succeed in the role.

The successful applicant will receive an attractive remuneration package including company pension, health and life insurance benefits.

The role will be based at our office in Hertford, Hertfordshire. **Initially working remotely.**

If you would like to be considered please email your CV together with a letter / e-mail of introduction, stating your salary expectations, to recruitment@finglowconsultants.co.uk

- Applications are being accepted now, initial screening will be conducted via phone.
- Closing date for applications is 30th June 2020.
- Face-to-face video interviews for short listed candidates will then follow.
- Start date is anticipated August 2020.
- Working week will be 37.5 hours per week (typically 9.00 – 17.30).

Hertford has excellent access routes to the A10 and the A120. Hertford East railway station is a 10 minute walk away, with Hertford North being a similar distance.

The location of the office has good access into the town centre and to all the local amenities Hertford has to offer including a wide variety of shops and eateries.
